

Reshmi Divi

Data Analyst

PROFESSIONAL SUMMARY

A Data Analyst with **5+ years** of experience transforming complex datasets into actionable insights. Proficient in **SQL, Python, R, Tableau, Power BI, and Excel**, with expertise in **data wrangling, visualization, and statistical analysis**. Skilled in **ETL, A/B testing, and predictive modeling**, driving data-driven decision-making to optimize business performance. Adept at collaborating with cross-functional teams to improve processes and uncover growth opportunities. Experienced in working with cloud platforms like **AWS, Azure** to build scalable data solutions.

PROFESSIONAL EXPERIENCE

Microsoft | TX | *Data Analyst*

December 2023 – Present

- Built a data analytics pipeline processing **millions** of records daily, leveraging **Python, Pandas, and Matplotlib** to uncover trends, and implementing **ML models** to boost predictive accuracy by **35%**, driving data-informed decisions.
- Leveraged **Azure Data Factory** and **Azure Synapse Analytics** to streamline **ETL processes**, enabling efficient data integration and reducing data pipeline latency by **30%**.
- Applied expertise in **Supply Chain Management** and **Project Management** to optimize workflows, reduce operational costs by **20%**, and successfully deliver projects on time, enhancing overall business efficiency.
- Executed a **data cleansing** pipeline using **SQL** and **Apache Spark**, streamlining data processing times and improving the accuracy of analytics.
- Designed interactive dashboards and automated reports using **Power BI** and **MS Excel**, enabling real-time insights and reducing manual reporting efforts by **50%**, improving data-driven decision-making.
- Implemented data mining and **machine learning** models using **SAS**, uncovering hidden patterns that enhanced predictive accuracy by **35%** and optimized business decisions.

PayPal | TX | *Data Analyst*

September 2022 – November 2023

- Created and optimized **ETL** workflows using **SSIS, SAS, and SPSS**, automating data transformations and improving reporting efficiency by **40%** for large-scale analytics.
- Optimized **MySQL** storage and retrieval, automating data processing with **Python**, improving efficiency, and cutting query time by **30%**.
- Established **AI-driven** analytics models using **Python** and **Seaborn**, visualizing complex trends and increasing predictive accuracy by **35%** for data-driven decision-making.
- Assassinated **problem-solving** strategies to streamline data processes and generate actionable insights, while using **Tableau** for sophisticated data analysis and visualization to find important trends and solutions that enhanced business operations.
- Engineered a scalable data pipeline on **AWS**, utilizing **S3, Lambda, and Redshift** to process terabytes of data daily, enhancing efficiency and cutting **ETL** processing time by **40%**.
- Leveraged **MS Excel** for data analysis, automation, and streamlined reporting with formulas and **pivot tables**.

Zensar Technologies | India | *Data Analyst*

August 2018 - July 2021

- Modeled and deployed a scalable data pipeline on **AWS** using **S3, Glue, and Redshift**, automating data ingestion and transformation for real-time analytics, reducing query latency by **40%**, and enhancing data availability for business intelligence teams.
- Engineered **machine learning** models using **Python** and **Pandas**, optimizing data pipelines for predictive analytics, automation, scalability, and actionable insights.
- Constructed statistical models in **R** and visualized key insights using **ggplot2**, enabling trend analysis and forecasting that improved demand predictions by **30%**, optimizing inventory management and business operations.
- Implemented **data cleaning** and **wrangling** using **SQL**, transforming raw datasets into structured, high-quality data for analytics, reporting, and decision-making.
- Generated dynamic **Power BI** dashboards with **DAX calculations** and **MS Excel** integration, combining real-time **KPIs** from multiple sources to enhance operational efficiency by **25%** and deliver interactive, drill-down reports.

TECHNICAL SKILLS

Languages/Packages: Python, R, SQL, PL-SQL, Restful API, Spark, NLP, NumPy, A/B Testing and Experimentation, SSIS, SAS, SPSS, Pandas, Matplotlib, SciPy, ggplot2, TensorFlow, Keras

Visualization Tools/Database: Tableau, Power BI, ETL, JIRA, Google Analytics, Alteryx, Seaborn, Salesforce, Looker, QlikView, Pardot, Marketo, AWS (Athena, Redshift), Azure, Oracle, Snowflake, Adobe Analytics, ArcGIS, QGIS, Story Map, UltraEdit, Navicat 15, MS Excel

Database: MySQL, SQL Server

Management: Project Management, Agile, Scrum Framework, Google Workspace, Microsoft Project, Logistics Management, Operations Management, Supply Chain Management, Lean Six Sigma, MS Office

Tools and Services: Google BigQuery, Looker, Informatica Power Center, RStudio, Teradata, MS Access, MS Excel, LiveRamp

Other Skills: Data Cleaning, Data Wrangling, Critical Thinking, Communication Skills, Presentation Skills, Problem-Solving.

EDUCATION

Master's in Computers Science,
University of North Texas, Denton, TX, USA.

Bachelors in Computers Science,
K L University, Guntur, Andhra Pradesh, India.
