SUMMARY

Data Analyst with around **4 years of experience** leveraging **SQL, Python, R**, and BI tools to drive data-driven decision-making across finance, consulting, and **supply chain** sectors. Skilled in designing scalable ETL pipelines, managing cloud infrastructure (**AWS S3, Redshift, Lambda, Azure**), and building interactive dashboards with **Power BI** and **Tableau**. Proven ability to conduct statistical and predictive analysis, implement **machine learning models (TensorFlow, Scala)**, and collaborate cross-functionally in Agile environments using tools like **Databricks, Airflow, Jira**, and **Confluence**. Adept at improving reporting efficiency, optimizing data workflows, ensuring compliance, and delivering actionable insights that enhance **performance, retention**, and **ROI**.

TECHNICAL SKILLS

Languages/Packages: Python, R, SQL, Restful API, Spark, NLP, NumPy, A/B Testing and Experimentation, SSIS, SAS, SPSS, Pandas, Matplotlib, SciPy, ggplot2, TensorFlow, Keras

Visualization Tools/Database: Tableau, Power BI, ETL, JIRA, Google Analytics, Alteryx, Seaborn, Salesforce, QlikView, Pardot, Marketo, AWS, Azure, Oracle, Snowflake, Adobe Analytics, ArcGIS, QGIS, Story Map, UltraEdit, Navicat 15, MS Excel **Database:** MySQL, SQL Server

Management: Project Management, Agile, Scrum Framework, Google Workspace, Microsoft Project, Logistics Management, Operations Management, Supply Chain Management, Lean Six Sigma, MS Office

Tools and Services: Google Big Query, Looker, Informatica Power Center, RStudio, Teradata, MS Access, MS Excel, LiveRamp

Other Skills: Data Cleaning, Data Wrangling, Critical Thinking, Communication Skills, Presentation Skills, Problem-Solving.

PROFESSIONAL EXPERIENCE

BlueCross BlueShield | MO | *Clinical Data Analyst*

June 2024 - Present

- Validated, codified, and normalized clinical data across multiple EHR/vendor platforms (**Epic, Athena, AllScripts, NextGen**), developing optimized **SQL** queries and stored procedures that reduced report generation time by 30% and improved data accessibility for clinical teams.
- Constructed, built, and quality-tested clinical quality measures via **SQL**, coordinating with IT to move validated measures from development to production while ensuring 99% data accuracy across regular production job runs.
- Analyzed data integrity issues and validated practice-level measures via **SQL** across hundreds of practices, identifying coding patterns causing measure discrepancies and partnering with project coaches to resolve root causes—reducing data inconsistencies by 20%.
- Served as key project member coordinating measure definitions and reporting across cross-functional and clinical teams, establishing KPIs and data requirements that streamlined integration and strengthened stakeholder confidence in reported measures.
- Managed clinical data within **CareCentral/BIC UI** and scalable **AWS S3** data lakes, executing end-to-end ETL pipelines and rigorous data cleaning to support accurate, timely analytics and consistent adherence to project reporting deadlines.
- Delivered ad-hoc and recurring reports/dashboards using **Power BI, Excel**, and **Python**-based statistical analysis, uncovering actionable insights and cost-saving opportunities valued at \$500K while supporting predictive analytics initiatives.

Cargill | India | *Data Analyst*

January 2022 - July 2023

- Executed **advanced analytics** and **workflow automation** on supply chain and production datasets with **Python** and **MySQL**, resulting in a **25%** decrease in manual operations.
- Leveraged **Azure Synapse Analytics** to perform large-scale data analysis, reducing query processing times by **30%**.
- Implemented **Scrum methodologies** to optimize project workflows, while applying strong **time management** practices to meet tight deadlines, increasing team productivity by **30%**.
- Reduced processing time by **20%** by using **Python** libraries for data analysis and manipulation, such as **pandas** and **NumPy**.
- Assembled and streamlined **ETL pipelines** for integrating multi-source data from procurement, logistics, and manufacturing, improving overall data integrity and reducing latency in **analytics** delivery.
- Designed, implemented, and managed **Power BI** dashboards and executive reports, empowering stakeholders to track **KPIs** and make data-backed decisions, increasing reporting efficiency by **30%**.
- Used **Excel's** advanced formulas and functions (e.g., **VLOOKUP, SUMIFS**) to perform data cleansing, validation, and manipulation tasks efficiently.
- Synchronized efforts with **cross-functional teams** to uphold **data governance** standards and **regulatory adherence**, issuing regular compliance updates to bolster **audit transparency** and **risk mitigation**.

EDUCATION

Master's in Health data science,
Saint Louis University, MO, USA.

Bachelor's in Sciences,
Gokaraju Rangaraju college of pharmacy, India.

PROJECTS

EHR Data Normalization & Quality Measure Validation

- Consolidated and normalized clinical data across multiple EHR platforms (**Epic, Athena, AllScripts, NextGen**), developing **SQL**-based validation rules to identify and correct coding inconsistencies across hundreds of practices.
- Built and quality-tested clinical quality measures via **SQL**, partnering with IT to migrate validated measures from development to production and reduce measure discrepancies by 20%.

Clinical Data Integrity & Practice Performance Analysis

- Investigated low-performing measure scores across provider practices, identifying root-cause coding patterns and documentation gaps affecting HEDIS/quality reporting accuracy.
- Collaborated with project coaches and practice staff to implement first-level problem-checking protocols, improving measure confidence and reducing reporting turnaround time.
