

Keerthi Reddy Peddireddy

Software Engineer

SUMMARY

Software Engineer with **4+ years of experience** building scalable, high-performance applications using **Java, Spring Boot, React, and TypeScript**. Strong expertise in **microservices architecture, RESTful APIs, GraphQL, and cloud-native development on AWS (ECS, EKS, Lambda, S3)**. Proven ability to design **distributed systems**, implement **CI/CD pipelines**, and optimize performance using **PostgreSQL, MySQL, Elasticsearch, and Kafka**. Demonstrated success in improving system reliability, reducing deployment time, and delivering data-driven solutions in **Agile environments**.

SKILLS

Programming Languages: Java (11/17), Python, JavaScript (ES6+), SQL

Frontend: React.js, TypeScript, HTML5, CSS3, Tailwind CSS, Single Page Applications (SPA), REST API Integration

Backend: Spring Boot, REST APIs, GraphQL, Microservices Architecture, Distributed Systems, Event-Driven Architecture, FastAPI

Cloud & DevOps: AWS (ECS, EKS, Lambda, S3, RDS, EMR, MWAA), Docker, Kubernetes, Terraform (Infrastructure as Code), CI/CD Pipelines, GitHub Actions, ArgoCD

Data & Messaging: Apache Kafka, Event Streaming, Asynchronous Processing, PySpark, Apache Airflow, ETL Pipelines

Databases: PostgreSQL, MySQL, Redis, Query Optimization, Caching Strategies

AI / Search: LLM Integration, Semantic Search, Natural Language Processing (NLP), AI-powered Applications, Prompt Engineering

Development Practices: Microservices, Distributed Systems, REST API Design, Agile/Scrum, Git, Code Reviews

PROFESSIONAL EXPERIENCE

Stripe | Remote | Software Engineer

September 2024 – Present

- Engineered AI-powered search and knowledge discovery systems using **React (TypeScript)** and **Java (Spring Boot)**, enabling intelligent querying of internal documentation with contextual responses and citations.
- Developed scalable **RESTful APIs** and **GraphQL services** to deliver structured data across internal platforms, improving accessibility of employee directories and knowledge systems.
- Built dynamic, responsive UI components using **React** and **Tailwind CSS**, enhancing user engagement through personalized recommendations and automated workflows.
- Designed optimized data models in **PostgreSQL** and integrated **Elasticsearch** for advanced full-text search, improving search relevance by **25% through A/B testing**.
- Implemented robust **CI/CD pipelines** using **GitHub Actions** and **Docker**, enabling automated testing and **zero-downtime deployments** on **AWS ECS**, reducing deployment time by **35%**.
- Created cloud solutions leveraging **AWS (S3, Lambda, CloudWatch)** with automated monitoring and alerting, reducing incident response time by **40%** and storage costs by **20%**.

bigbasket | India | Software Engineer

August 2020 – June 2023

- Developed **microservices-based backend services** using **Java, Spring Boot**, and **REST APIs** for a **Vendor Catalog Management Platform**, supporting **1,500+ vendors** and reducing onboarding time from **5 days to 48 hours**.
- Designed a **workflow** and **state management engine** using **Spring Data JPA, Hibernate**, and **MySQL**, handling **8K-10K monthly product submissions** with full audit logging across lifecycle states (draft, review, approval, archival).
- Built **responsive frontend dashboards** using **React.js** and **JavaScript**, enabling internal operations teams to manage catalog updates and reducing manual entry errors by **40%**.
- Implemented **event-driven order processing** using **Apache Kafka consumers**, reliably handling **200K+ daily order events** with idempotent processing and improved order lifecycle reliability.
- Containerized services using **Docker** and deployed to **AWS EKS (Kubernetes)** with automated **CI/CD pipelines**, improving deployment reliability and maintaining **99.8% platform availability during peak traffic events**.
- Collaborated cross-functionally within **Agile/Scrum** environments, partnering with **Product Managers** and **QA**, accelerating feature delivery by **30%** through efficient sprint planning and backlog prioritization.

EDUCATION

Master's in Computer Science | University of Cincinnati, Cincinnati, OH, USA.

Bachelor's in Computer Science | Tirumala Engineering College, Andhra Pradesh, India.
